

African Sky Villas

What is a Thermal Night Drive Safari?

Curious to know what wild animals come out at nighttime and what they do in Marloth Park? Looking for something to do in the evenings? We've got you! We offer a unique and special night safari experience in Marloth Park with our state of the art thermal technology, we see what you'd never find with spotlights or any other type of technology.

Why do we use a thermal camera?

Thermal cameras have an unlimited range of sight, you'll be able to see anything that gives off a heat signature near or far. With those facts in mind, spotting wildlife has never been easier, and another advantage is that you aren't disturbing anything while observing the wildlife.

How do we implement this technology?

We use a remote-controlled thermal camera which is mounted on the roof of a closed vehicle. Inside the vehicle, we have an HD screen that allows everyone to watch and enjoy these remarkable wildlife scenes.

What could potentially be seen on your safari?

We've seen Lion, Leopard, Hyena, Elephant and Buffalo on Kruger Park's side from Marloth. In Marloth Park, we find our regular wild residents like Giraffe, Zebra, Wildebeest, Kudu, and more. On the special occasions, we've found Porcupine, Genet, Greater & Lesser Bushbabies, etc.

Welcome to Thermal Night Drive Safaris!
